Anna,

Just an FYI...are these the same people that you were fighting about the name, etc.?

Hoping this letter finds you in the best of health and spirits,

Rashid A. Buttar, DO, FAAPM, FACAM, FAAIM

Medical Director, Advanced Concepts in Medicine  
The Center for Advanced Medicine and Clinical Research  
9630 Julian Clark Avenue

Dear Steven,

I wish to give my assurance to you that we, in our promotion of the LAPEX 2000 will only be using the name LAPEX 2000 in promoting, communicating, marketing and selling the device.

In addition we are developing our own material specific to each market and segment and this will include the clinical evaluation, professional endorsement where necessary and if appropriate clinical assessment. This has always been our intention and is the directive we have received from our business partners.

Sincerely

John Malherbe  
Marketing Director

My name is Steven Shanks and I am the President of Erchonia Medical I do not know if you are aware that we are the owners of the trademark LipoLaser and that Meridian has been using our research to promote there device. We hold the US patent for low level laser liposuction and we have spent millions of dollars on research proving the cellular and clinical effects.

We have an FDA approval for liposuction and have been published in every major Plastic Surgery and Cosmetic Surgery journal. We filed a trademark lawsuit against Meridian in the US for using our Lipolaser trademark.

Steven Shanks  
President  
Erchonia Medical

John

Thank you. There are a lot of knock off devices and there are very few that have actually created what they market. We have a patent on liposuction and have filed an international patent for non invasive fat emulsification. I am not trying to create conflict but I feel Meridian has tried to steal what we have created and I will prove it in a court of law.

The Lapex 2000 is approved for carpal tunnel in the US and they filed a substantial equivalence off of Microlight. I do not believe Meridian does any research at all with low level lasers.

Steve
